

Lighthouse Harbour

Built from 10294, 2026

LEGO 10294 Titanic, the set these pieces come from

Photo: The LEGO Group, via Rebrickable

2026

Built from 10294

LEGO 10294 is the Titanic: at 1.35 m long, one of the largest sets LEGO has made, split into three sections to show the grand staircase, the engine room and the boiler rooms. Its pieces come in the liner's black, white, tan and dark red.

2026

A harbour under a lighthouse raised from the Titanic's funnels.

1

9,092 pieces in LEGO 10294 Titanic (2021).

2

5,464 of them build this model: 60% of the box.

3

Nothing else to buy: every piece comes out of the box.

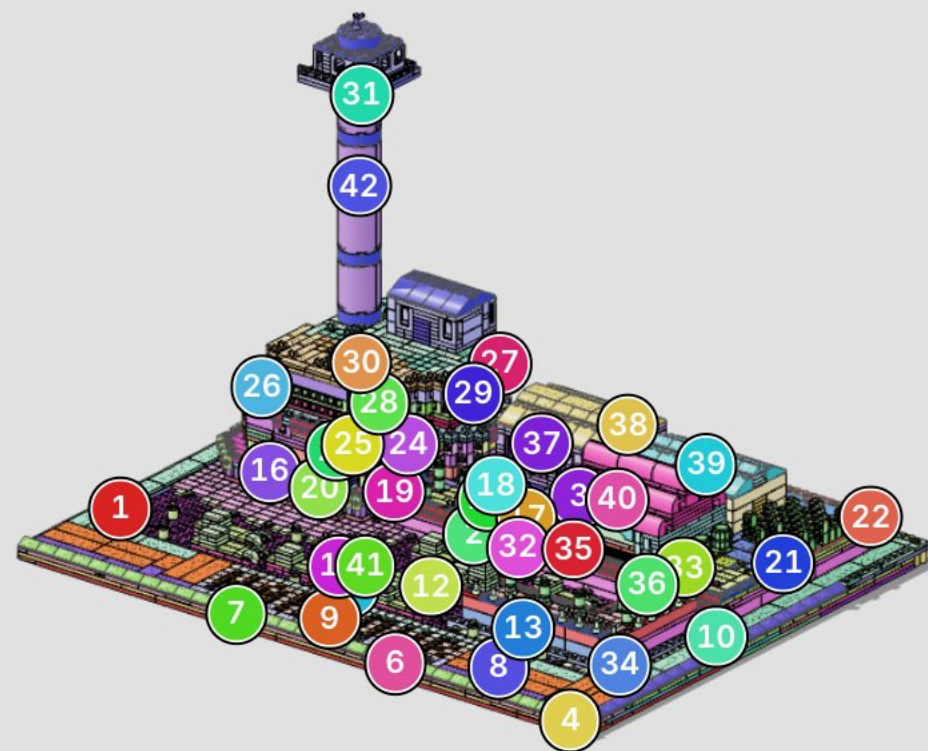

From the designer

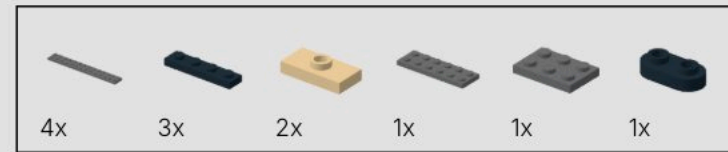

Every part of this harbour comes out of the 10294 Titanic box. On the headland, the four funnels, each a ring of bright light orange cylinder halves on a black round band, stand one on another as the tower, under a lantern glazed all round in the ship's window frames. Below the grey cliff, a stone quay carries a customs house, a warehouse and a boathouse under a curved dark red roof, a cargo yard and harbour lamps; a breakwater runs out to a red-banded harbour light, the quay faces are hung with the box's black neckwear brackets as fenders, and boats and buoys ride on the blue, all on a bevelled base with the name in pearl gold.

157

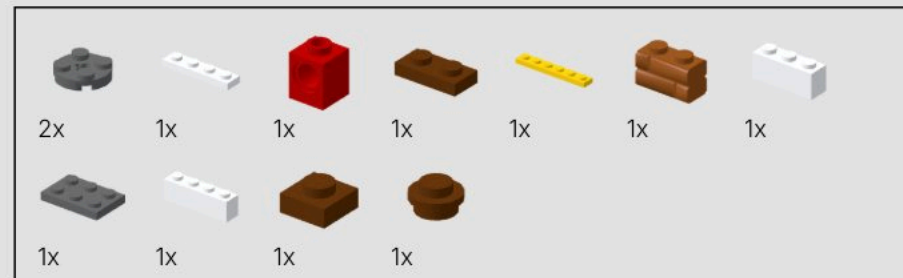

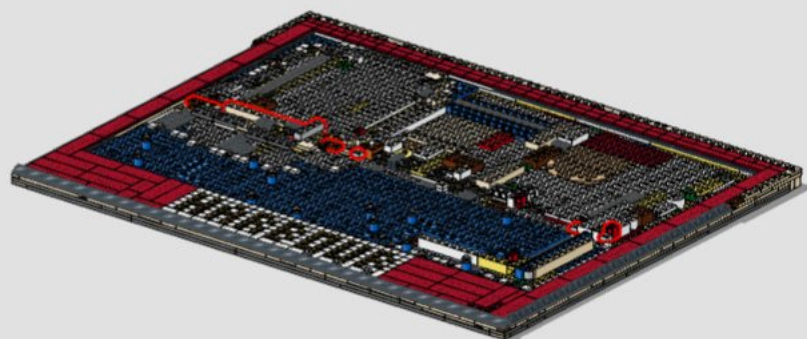

An aerial view of a large, rectangular, multi-colored structure, possibly a stadium or arena, with a red border and a blue interior. The structure is composed of many small, colored blocks, giving it a pixelated or mosaic-like appearance. The red border is prominent, and the blue interior is filled with a grid of blue blocks. There are some smaller, multi-colored blocks scattered throughout the interior, possibly representing buildings or other structures. The overall shape is a large rectangle with rounded corners.
